

2018 is Jacco's 50th year in business!

To celebrate this milestone, we are sharing a monthly feature that highlights an aspect of Jacco's past, present or future plans for our company's continued client satisfaction and growth.

This month, we want to tell you-our customers, clients and friends-about the history of [WaterFurnace](#), which was founded in 1983 and has remained a leader in the HVAC industry for decades.

WaterFurnace began as a McQuay distributor and established North American distribution of geothermal products in a total system package. The company then purchased a water source heat pump product line from McQuay and established manufacturing with an assembly line that moved from Staunton, VA to Fort Wayne, IN.

After significant growth and revolutionary product releases, WaterFurnace moved into a new 110,000 sq. ft. manufacturing and headquarters facility in Fort Wayne in 1991, where the company's HQ operates today. The impressive facility is completely heated and cooled by WaterFurnace geothermal technology utilizing a large pond loop.

WaterFurnace's commercial product line began as early as 1985, just two years after the company was established. They then continued to produce innovative commercial systems, like the Extended Range (WX) Series, and grew to offer many sizes and options including water to water, package systems and modular chillers.

From 1985 to the present day, the commercial product line and control offerings have expanded tremendously.

Over the years, WaterFurnace has paved the way with some industry "firsts," such as...

- First true bottomflow models
- First internally trapped condensate line
- First quick-attach wire harnesses on fan motors and control boards
- First communicating thermostat
- First zoning package
- First geothermal R410A unit
- First commercial unit with 5-speed ECM fan motor
- First geothermal variable speed compressor unit

As a family-owned business for 50 years, Jacco can attribute our success to our partnerships, collaborations and relationships with other innovators in the HVAC industry, like WaterFurnace. We would like to thank all of our employees, customers and colleagues for making Jacco a leading representative in the HVAC industry for 50 great years. Cheers to many more!
