

## SANUVOX

**What is more effective when it comes to air quality?  
Cleaning the coil that air flows through or the air itself?**

**We're glad you asked.**

**Sanuvox offers two different types air cleaning processes:**

**1.** The most commonly known (AND widely-used) system:  
Object Cleaning AKA Coil Cleaning

- Designed to prevent and destroy mold and other microbial growth from growing on the evaporator coil and surrounding areas
- Reduces energy consumption
- Reduces odors associated with mold
- Improves air quality
- Eliminates the chemical cleaning of coils
- [Lamp Positioning Report](#)

**How it works in a nutshell:** You have the object "coils", the system works to keep the object clean and, in turn, the air quality is maintained.

*In reality, is it cleaning the coils or air better? You decide.*

## 2. Sanuvox's patent process: Air Disinfection

Let's examine one of the products that utilizes this technology (Sanuvox's BioWall):

- Works parallel to air flow
- Completes the work of filters by sterilizing what goes through them
- No addition to pressure losses
- Ensures continuous air quality
- Destroys up to 99.9999% of bio-contaminants
- [Bacteria and Spore Kill Efficiency Report](#)

**How it works in a nutshell:** Cleans the air specifically, not what the air flows through. Anybody and everybody can clean the object.  
**Sanuvox is the best at cleaning air.**

If you are looking to eliminate odors, Sanuvox offers UV air purification systems that destroy odors and improve air quality inside garbage rooms and other buildings where smell is an issue.

***There are two styles of UV that kill different scents:***

**UVC:** Kills the nasty stuff in the air

**UVV:** Kills the odors in the air (odor control)

Jacco partnered with Sanuvox to eliminate the smell of diesel fumes using UVV technology for one of US Foods' office spaces.

Odors, especially something as strong as diesel fumes, can cause an unpleasant and potentially unsafe office environment.

Whether you're trying to eliminate an odor or want cleaner, healthier air, **Sanuvox has your solution.**
