

Jacco Announces New Product Line

HUDSON, OHIO - (Feb. 2016) Jacco & Associates, a premier provider of HVAC Systems and Service, is proud to announce their recent appointment as representatives of Suburban Manufacturing. Suburban manufactures Dynaline and DynaPack gas heating and cooling horizontal and vertical PTAC units.

Mike Poiniski, the owner of Northeast Equipment Sales, Inc. and the previous representative of Suburban Manufacturing, is closely working with Jacco & Associates. Mike's position with Jacco & Associates is the Suburban "Champion", providing his expertise and technical background to specifiers, installers and technicians.

"We are excited about this new business opportunity," said Greg Drensky, Vice President of Jacco. "The addition of the Suburban product line and Mike Poiniski as our Suburban expert will allow us to expand our potential to provide engineering, design and product support through a holistic systems approach."

Suburban Manufacturing developed the first gas-fired packaged terminal air conditioner (PTAC) in 1985 called the Dynaline. Now, in its third generation design, Suburban is a leading supplier to the senior housing industry as well as other commercial markets. Their new DynaPack, a vertical packaged heating and cooling product line, is an exciting new offering for designers and builders to heat and cool multiple rooms.

"We look forward to serving our customers with new options in HVAC technology," said Drensky. "Our goal is to provide each job we take with expert service, quality equipment and lifetime support. We are a purpose-driven company and we pride ourselves on doing what we say we will and doing it right."

Jacco offers contractors and engineers support capabilities to provide Full Circle Support in the HVAC industry throughout Ohio and across the nation.
