

2018 is Jacco's 50th year in business!

Part of our purpose-driven process at Jacco is a promise of continued education for our staff and for the construction and engineering professionals we work with.

In 2018, we trained nearly 200 engineers and contractors at our seminars with topics including:

- HVAC Systems Basic Training
- Applying Modular Chilled Water Systems
- Best Practices for DX Piping
- Applying Adiabatic & Steam Humidification Systems
- Applying Low Dewpoint OA Systems

Jacco has also provided private Lunch and Learn Seminars at individual offices for hundreds more in 2018.

By offering these opportunities, Jacco makes things easy for construction and engineering professionals who need to complete educational credit hours to maintain their licenses. By coming to just one Jacco seminar each quarter, contractors can finish all of their needed credits.

Moreover - Jacco's President Jerry Cohen and Vice President Greg Drensky conduct most of the teaching on their own.

"Education is a priority for our staff," said Jerry Cohen. "We regularly send our employees out to trainings and other seminars so that everyone is up to speed with the latest and greatest in industry knowledge, innovations and technical skills."

Thank you to all of our employees, customers and colleagues who have utilized our knowledge-based resources throughout our 50-year history.

Cheers to many more!

Thank You to Our 50th Anniversary Sponsors!
