Focused On The Engineered Environment

March, 2008

Welcome to PPORTUNITY, a monthly newsletter provided by Jacco & Associates. Jacco's focus on engineering and design concepts will improve your HVAC system while significantly reducing design time, making you more productive for your clients.

March Feature:

ALERTON®

BACtalk Building Security

The Alerton BACtalk Building Security System easily integrates with your BACnet BAS. The controller supports Web connectivity, which means lower installation and maintenance costs, enhanced system performance, increased operator and enterprise access, and improved flexibility for future system expansion and change. It is rich with easy to use features and browser based views of credentials, schedules, alarms and activities. The multiple views are based on each individual user's access rights. View alarms and activities from an intuitive console that enables you to quickly view graphic layouts of the facility and locate points of entry, exit and alarms. Actions can be automatically triggered in response to events, and the Alerton BACtalk Building Security can track all events and user interactions.

Proximity Card

End User Value:

- ⇒ Personal Safety
- ⇒ Building Security Integrity
- ⇒ Property & Asset Protection
- ⇒ Enhanced Property Value
- ⇒ Reduced Insurance Rates
- ⇒ Improved Accountability
