

➤➤ New Product News

Jacco & Associates is pleased to announce the availability of Sanyo Eco-i VRF products. Sanyo's innovative line of split system heat pumps utilize environmentally friendly R410a refrigerant and an advanced, variable refrigerant flow system. These technologies result in a system that is economical to install and operate and is also environmentally friendly. The systems can be configured with a wide range of evaporator configurations and are available with condenser capacities from 3 to 25 tons. Sanyo has a proven reputation for providing quality HVAC products to the U.S. market for over 20 years.

Jacco & Associates has been serving the HVAC community since 1968, and these new products reinforce Jacco's position as a provider of innovative, environmentally responsible solutions.
